

Planning Hydrology for Constructed Wetlands Course Agenda

1. Hydrogeomorphology as the basis for wetland planning
2. Depth, duration, and timing of water as the hydrologic basis for wetland construction
3. Preparing wetland goals emphasis on hydrology
4. Basics of wetland hydrology
5. Water budgets for wetlands
6. Preparing hydrographs/hydroperiods
7. Input and output data collection and interpretation
8. Hydrologic Models for constructing wetlands
9. The hydrologic basis of forested wetland construction/restoration
